## Project Experience

### Customer Dispute Classification

GitHub: [github.com/Lesego-1/Customer-Dispute-Classification](https://github.com/Lesego-1/Customer-Dispute-Classification)

- Built an end-to-end complaint classifier (Django + Bi-LSTM) that flags likely disputes from raw text.
- Added Hugging Face summarization to auto-condense complaints and ease support review.
- **Potential impact:** faster dispute triage and richer product insights through automated risk scoring.

### Customer Review Sentiment Analysis

GitHub: [github.com/Lesego-1/NLP-Project](https://github.com/Lesego-1/NLP-Project)

- Developed an LSTM model (Keras) to classify sentiment in 1,000+ product reviews, with custom preprocessing (regex, tokenization, vectorization).
  - Achieved 84% accuracy; applied Aspect-Based Sentiment Analysis to extract product-level insights, supporting quality monitoring and marketing.
- 

## Skills

- **Programming & Tools:** Python, SQL, Git, Jupyter, VS Code
  - **Libraries & Frameworks:** Pandas, NumPy, scikit-learn, Matplotlib, Seaborn
  - **ML & Data Concepts:** Machine Learning, Data Preprocessing, Model Evaluation
  - **Visualization Tools:** Tableau, Power BI
  - **Soft Skills:** Analytical Thinking, Communication, Problem Solving
  - **Languages:** English, Zulu (Beginner)
- 

## Education

Diploma in Information Technology | Richfield Graduate Institute of Technology  
2023–2025 (Available Immediately)

- Coursework in Programming, Databases, and Quantitative Methods; supplemented with self-learning in Data Science and ML.
- Completed hands-on projects using Python, Tableau, and scikit-learn to build practical analytics and ML skills.
