SUMMARY

Junior Software Engineer with hands-on experience developing **C#.NET web applications and RESTful APIs** through an engineering internship and open-source contributions. Strong foundation in **ASP.NET Core, SQL databases, and authentication/authorization**, with a focus on writing clean, maintainable code. Seeking an entry-level **.NET / C# role** to contribute to backend and web application development while continuing to grow as a developer.

SKILLS

- **Languages:** C#, JavaScript, Python, SQL
- **Frameworks & Web:** ASP.NET Core, Entity Framework Core, Django, Tailwind CSS
- **Databases:** SQL Server, MySQL
- **Tools:** Git, GitHub, Docker, Postman, Swagger

EXPERIENCE

Software Engineer Intern

Hiteknoology Solutions
March 2026 - Present

- Built and redesigned client websites using **HTML, JavaScript, and TailwindCSS** for nonprofit organizations.
- Developed key UI pages including **homepages, services pages, and galleries**.
- **Identified and fixed navigation bugs**, improving site usability.
- Conducted **pull request reviews**, identifying UI issues before merges.
- Collaborated with the team using **GitHub workflows and branch-based development**.

Open Source Contribution

Doccano
January 2026

- Improved production API reliability by enforcing **UUID-based resource identifiers**, ensuring consistent and correct HTTP 404 responses.
- Hardened backend **validation and error handling**, reducing edge-case failures under real-world API usage.
- Collaborated with maintainers through **formal code reviews**, addressing feedback.

Software Engineering Trainee — Perpex

Program-based Engineering Internship
July 2025 – October 2025

- Developed **web APIs**, delivering validated CRUD functionality aligned with business requirements.
- Designed **normalized SQL schemas** and managed migrations, ensuring data integrity and maintainable database evolution.
- Implemented **JWT authentication and RBAC authorization**, strengthening application security and controlled access.
- Participated in **code reviews**, improving code quality, readability, and adherence to engineering standards.

PROJECT

User Management & Authentication Web Application

C#, ASP.NET Core, MVC, JWT, SQL Server
github.com/Lesego-1/User-Authentication-API

- Built an **ASP.NET Core web application** implementing **JWT authentication, refresh tokens, and role-based access control** for secure user management.
- Developed **REST APIs and MVC controllers** with **EF Core and SQL Server**, including migrations and server-side validation.

EDUCATION

Diploma in Information Technology

Richfield Graduate Institute of Technology • Johannesburg, Gauteng • 2025

Certificates

- **Microsoft** - Create Cloud-Native apps and services with .NET and ASP.NET Core
- **Microsoft** - Create a web API with ASP.NET Core controllers
- **Microsoft** - Foundational C# with Microsoft
