SUMMARY

Backend-focused Software Engineer specializing in JavaScript and Node.js, with experience building secure REST APIs, implementing JWT authentication, and designing SQL-backed systems. Proven ability through internships and open-source contributions.

SKILLS

- **Languages:** JavaScript, Python, SQL, HTML/CSS
- **Frameworks & Web:** Tailwind CSS, Django
- **Databases:** PostgreSQL, MySQL, SQL Server
- **Tools:** Git, GitHub, Docker, Postman

EXPERIENCE

Software Engineer Intern

Hitekology Solutions
March 2026 - Present

- Updated **SQL** database records, modifying two key fields to standardize formatting, resulting in improved frontend display.
- Built and redesigned client websites using **HTML, JavaScript, and TailwindCSS** for nonprofit organizations.
- Developed key UI pages including **homepages, services pages, and galleries**.
- **Identified and fixed navigation bugs**, improving site usability.
- Conducted **pull request reviews**, identifying UI issues before merges.
- Collaborated with the team using **GitHub workflows and branch-based development**.

Open Source Contribution

Doccano
January 2026

- Improved production API reliability by enforcing **UUID-based resource identifiers**, ensuring consistent and correct HTTP 404 responses.
- Hardened backend **validation and error handling**, reducing edge-case failures under real-world API usage.
- Collaborated with maintainers through **formal code reviews**, addressing feedback.

Software Engineering Trainee — Perpex

Program-based Engineering Internship
July 2025 – October 2025

- Developed **web APIs**, delivering validated CRUD functionality aligned with business requirements.
- Designed **normalized SQL schemas** and managed migrations, ensuring data integrity and maintainable database evolution.
- Implemented **JWT authentication and RBAC authorization**, strengthening application security and controlled access.
- Participated in **code reviews**, improving code quality, readability, and adherence to engineering standards.

PROJECT

Task Manager with Authentication & Role-Based Access

Node.js, Express, PostgreSQL, JWT Authentication
<https://github.com/Lesego-1/Task-Manager>

- Built a full-stack Task Manager with JWT authentication and role-based access for secure task control.
- Created CRUD task system with metadata and responsive Tailwind CSS UI to boost productivity.
- Developed Node.js + PostgreSQL backend with modular APIs, password hashing, and protected routes.

EDUCATION

Diploma in Information Technology

Richfield Graduate Institute of Technology • Johannesburg, Gauteng • 2025
